Data overview 2020/21

(last 3 years where applicable)

All pupils sit yearly GL Assessment tests in Maths and English. These are nationally benchmarked tests and allow the school to track progress of each pupil and cohort overall.

Although these are a point in time test the overview helps give an accurate picture of how the cohort is performing. The scores are in Standardised Age Scores where 100 would be the National average. A score that stays the same the following year indicates that a year's progress has been achieved. A score higher would indicate more than expected progress and a score lower would be less than expected progress.
